Application No.: Not Yet Assigned Docket No.: 3673-0196PUS1

## IN THE ABSTRACT OF THE DISCLOSURE

Please insert the abstract of the Disclosure at the end to of the Specification as follows:

Tennis shoes, comprising soles (5) having bases (7) and a large number of horizontal reinforcement crests (9), the horizontal reinforcement crests (9) further comprising ground-contact surfaces (11), toe side wall surfaces (13), and heel side wall surfaces (15), wherein the cross sectional shape of the horizontal reinforcement crests (9) is asymmetric, the tilted angle ( $\theta$  b) of the heel side wall surfaces (15) is larger than the tilted angle ( $\theta$  a) of the toe side wall surfaces (13), a difference therebetween ( $\theta$  b-  $\theta$  a) is 10 to 60°, the height (H) of the horizontal reinforcement crests (9) is 1 to 8 mm, the ratio (L2/L1) of the distance (L2) of the ground-contact surfaces (11) to a distance (L1) of a boundary part between the bases (7) and the horizontal reinforcement crests (9) is 0.2 to 0.8, and the ratio ( $\mu$  a/  $\mu$  b) of the coefficient of friction ( $\mu$  a) of a bottom surface in toe direction to the coefficient of friction ( $\mu$  b)in heel direction is 0.3 to 0.9.
